What can this app do?

VAT control list is an app for the precise analysis of tax postings in Microsoft Dynamics 365 Business Central. It helps to keep an eye on VAT items and posted G/L accounts and saves time-consuming filtering of G/L items.
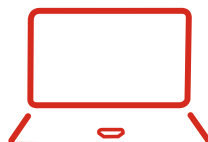

The VAT control list provides detailed information on the posting date, document number, description, VAT business and product posting groups, movement and VAT amount. This list is excellent for identifying incorrect tax entries and false entries.
